Debuting in 2014, The Lawn on D, located on D Street in Boston's Fort Point neighborhood, provided a brand new destination for locals looking for something new to experience in the city. By combining family friendly events, outdoor concerts and screenings, a tented beer garden, food trucks, art installations and community projects into one innovative space, The Lawn on D has quickly become a hot spot where Bostonians can come together. Standout installations and events include the interactive art display "Swing Time" (above); Sound of Our Town, a one-day music festival; and Illuminus D, a nighttime light spectral created by Boston creative studio Materials and Methods.
