It's not often that lit-nerds and beer-snobbs can find common ground with each other that deviates from a toast about the deliciousness of beer—but thy game has changed! Our favorite neighbors to the north (or east, west, or south—depending on where you live), [Narragansett](#), has come out with an [H.P. Lovecraft Honey Ale](#) for the ultimate New England pairing.

The 7% ABV ale is set for release on January 19th to celebrate its 125th anniversary—the birthdate of Lovecraft's hero and literary Debbie-downer, Edgar Allan Poe. After hitting a home-run with their [Autocrat Coffee Milk Stout](#) and [Del's Shandy](#), 'Gansett's on a brewery's equivalent of when guys like James Franco start writing memoirs; it's weird, but sure, why not?

The Honey Malt-laden ale be available in, both, tall boys and on tap for a limited time. So if you like beer, horror fiction, and New England, grab a can and follow me on Twitter—because you've got good taste.

[Jeremy Glass](#) is the [Vice](#) editor for Supercompressor and is a born-and-bred New Englander.
