

Dermelect Nail Polish (\$14) in Power Trip

While we can all agree this is a great time to show off some cool nail art, those who prefer a classic manicure should consider picking up Dermelect's Nail Polish in Power Trip. We should point out that this isn't your ordinary bold red lacquer! Made with ProSina Keratin Protein isolated from pure New Zealand wool, the polish works to strengthen brittle nails-plus it protects them from chipping and peeling-and provides a gorgeous glossy color that lasts.
