Pink Ribbons

The wearing of awareness ribbons has intensified in recent years. Yellow to support our troops, red for AIDS, and pink for breast cancer are the most recognizable, but nearly 100 color-cause matches exist. We're all for recognition and

research, but we also think you should put your money where your lapel is. Show your support by indulging in products to pamper yourself, your friends, and any of the women in your life, in ways that feel luxurious and beautiful. ☐
