Obviously, we all know about the wide range of natural beauty products on the market now. We are becoming more and more aware of the chemicals that are in our everyday beauty products, and I am hearing about great all-natural brands now more than ever. One company that I have known about for a few years now is [The Body Deli](#). They offer the purest ingredients in their products and even have a line called "[Ice Box](#)" which is so fresh, the products have to be refrigerated.

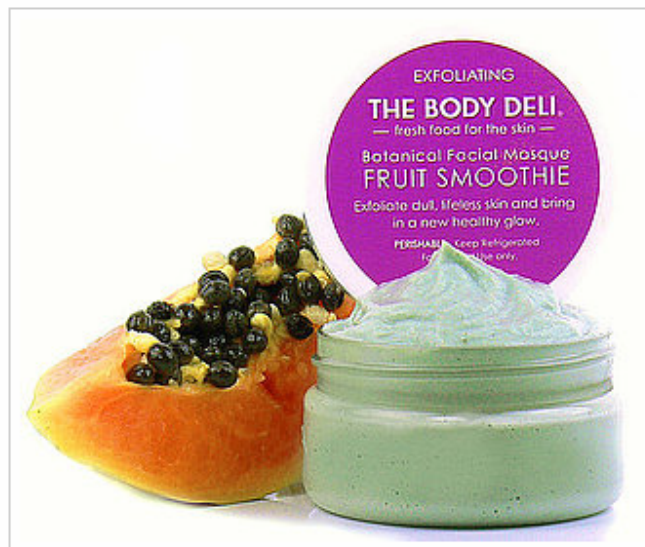

The *Ice Box* collection is literally the coolest thing to happen to skincare. The ingredients such as [yogurt](#), [fresh cucumber juice](#), [seaweed](#), [organic papaya enzymes](#), and [fresh peach puree](#) are pioneered at their peak of potency to bring you the best results. All the ingredients are natural and organic. The products are shipped to you in a special insulated box with ice packs to keep them cool until they reach your door.

I tested out the **Sea Cucumber Gelee** (\$45), the **Fruit Smoothie Mask** (\$24) and the **Blueberry Fusion Polish**. The Sea Cucumber Gelee is my favorite product for many reasons. It works as an amazing hydrator and I was so surprised at the small amount that was needed to cover my entire face. The main ingredient besides fresh cucumber cells is **Hyaluronic Acid**. I love this fact about Hyaluronic Acid- "it has the ability to bind more than ten times its weight in moisture." Now compare that to your average moisturizer! Applying the Gelee was a calming process in itself because it was so cool from being in my refrigerator and it felt great on my skin. I put it on at night to relax me before bed and I woke up with extremely smooth skin.

Of course the Sea Cucumber Gelee worked great after I washed my face with the **Blueberry Fusion Polish**. It has the right amount of scrubbing power and smelled and tasted (I licked my lips by accident and was pleasantly surprised) like *fresh blueberry yogurt*.

The **Fruit Smoothie Mask** looked like I had made it in my own kitchen because I could see small chunks of fruit on my face. After applying I could already feel it tightening my skin and because it was all natural, it smelled great and did not sting my eyes as some other masks do.

*On a side note, all of their products have expiration dates, which I think all beauty products should have, but don't worry they can last in your fridge for **3-6 months**. To find more about **The Body Deli's Ice Box** collection and other great natural products that they offer, you can visit <https://thebodydeli.com>!
